Sales revenues of this quarter amounting to Baht 11,466 million, went up about 4.6% from those of the same period last year. This was attributable to sales growth of Mobile Power Supplier (such as power tools, power supplies for broadband, printer, game machines, etc.), especially sales of cordless power tools in USA market which increased about 21.4% over the same quarter of last year and a 54.1% growth in Industrial Automation's sales due to increasing sales in South East Asia and India market. However, Telecom power supply sales reduced about 6.0 % from those of the same period last year largely owing to the low sales in EMEA and the depreciation of Euro currency (EUR).

Following the above sales growth and a proper control on material costs, gross profit of this quarter increased by 6.7% to Baht 3,124 million and the gross profit margin slightly rose from 26.7% in the same period last year to 27.2%. Selling and administrative expenses including R&D (SGA) of this quarter declined from the same period last year. Therefore, the ratio of SGA/sales was improved from 14.3% in the same period last year to 13.2% of this quarter. This was because of the recent depreciation in EUR resulting in lower SGA expenses as most of such expenses were incurred in EUR. Operating profit of this quarter therefore increased 18.3% from the same period last year and the operating profit margin improved to 14.0%, compared to 12.4% in the same period last year. Net profit increased by 14.6% to Baht 1,703 million with EPS of Baht 1.37, compared to Baht 1.19 in Q2-15.
