Agenda Item No .7 : Other matters (if any)

-None-

After completing all the consideration of the agenda, shareholder had the questions as follows.

1. What parts & components does the Company produce for Tesla? How much is this business in value?

Answer: The Company has Confidentially Contracts with our customers. Therefore, we cannot disclose such information.

2. In case the factory in India cannot be operational or has insufficient capacity due to the COVID-19 situation, does the Company have any plan to accommodate the situation?

Answer: The Company in Thailand can support the COVID situation. We have been preparing to expand our production capacity since two years ago. A new factory in the same area as our factory at Wellgrow Industrial Estate has been constructed to support the business growth of the Company for the next five years. Currently, the factory in India has almost completed construction. However, due to the COVID-19 situation, operations were delayed.

3. Does the Company have the policy to increase or maintain the market share of products related to electric vehicles (EV), solar power products or data center systems?

Answer: The Company's products are mainly power supplies, which we valued more for its technology change or innovation. The Company believes that by retaining a significant customer base over the next 5-10 years and conducting research and development in line with industry growth, we will naturally maintain our market share.

4. Does the Company have a policy to support the share distribution (free float) or to promote the liquidity in the Stock Exchange of Thailand.?

Answer: Currently, the Board of Directors has not yet formulated a policy on this issue. However, the Company may consider such a policy as appropriate in the future.

5. The investor would like to know the business trends in 2021 of each business group such as electric vehicles, cloud, telecommunication, regional business and plans to expand factories abroad to support future growth.

Answer: Having research and development in line with market demands is key to the Company's business operations. In the past two years, the Company has increased the research and development teams in Germany and India to support regional businesses in connection with the rise of Internet of Things (IoT) technology used in areas such as electric vehicles, data center system or telecommunication systems. These are all parts of the greater IoT infrastructure. The biggest business growth in the first half of the year is expected to be in power supplies for electric vehicles, followed by power supplies for data center systems.

As for overseas factory expansion, the Company plans to expand factories in India only. As for factory in Myanmar, the Company cannot expand at this time due to political unrest. However, the Company plans to increase production capacity in Thailand to accommodate the situation.

6. Does the prolonged political unrest in Myanmar affect the supply and growth of the Company? How?

Answer: The Company has been watching the situation closely in order to make proper production plans accordingly. Currently, the Company's business in Myanmar is still a small quantity of our overall business. For regional business, the Company will focus on India, Southeast Asia, New Zealand and Australia more.

After the questions from the shareholders were covered, Mr. Ng Kong Ming, Chairman, further explained the potential of the Company's business growth. Given today's increasing global demand due to the COVID epidemic and the Company's business capacity in terms of power supplies for data center systems, there is a huge increase in demand from businesses related to "New Normal" market trends such as e-commerce or e-finance which are all growing rapidly.
