

Automation for a Changing World

Extended Motion Controller DXMC Series

Delta Extended Motion Controller DXMC Series

The DXMC Series is an advanced synchronous multi-axis motion controller with max. 32 real axes and 64 virtual axes control. It provides tension control, rotary cut, flying shear and E-CAM function modules with user-friendly program editing for a wide range of industry applications, including packaging machines, printing machines, winding machines and industrial robots. In addition, the DXMC Series features optional CODESYS SoftPLC or KW SoftPLC to provide a flexible and customized motion control platform for machine upgrades and smart equipment.

To meet various user requirements, the DXMC Series includes Standard Type DXMC-S and Panel Type DXMC-P:

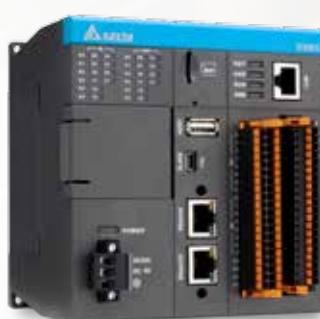

Standard Type DXMC-S supports various communications to connect the host controllers and field devices with high immediacy, speed, precision and flexibility:

- EtherNET: for connection with computers or host controllers
- EtherCAT: for communication with Delta Servo Drive ASDA-A2/A3-E Series
- CANopen: offers extendable I/O modules
- Built-in 16 DI / DO terminals
- SSI encoder signal and 2 sets of differential encoder signals
- Built-in 1 RS-485 communication port

Panel Type DXMC-P features high brightness and contrast built-in LED monitor as operation interface.

It integrates motion control functions and supports various communications:

- EtherNET: for connection with computers or host controllers
- EtherCAT: for high-speed communication with Delta Servo Drive ASDA-A2/A3-E Series
- RS-232 / RS-422 / RS-485 communication ports: for connection with peripheral devices

Standard Type DXMC-S

Synchronous multi-axis motion control, built-in 32 I/O terminals, EtherCAT bus, simple wiring

Panel Type DXMC-P

Built-in 7" & 10" LED monitor for display and operation

Table of Contents

Extended Standard Motion Controller

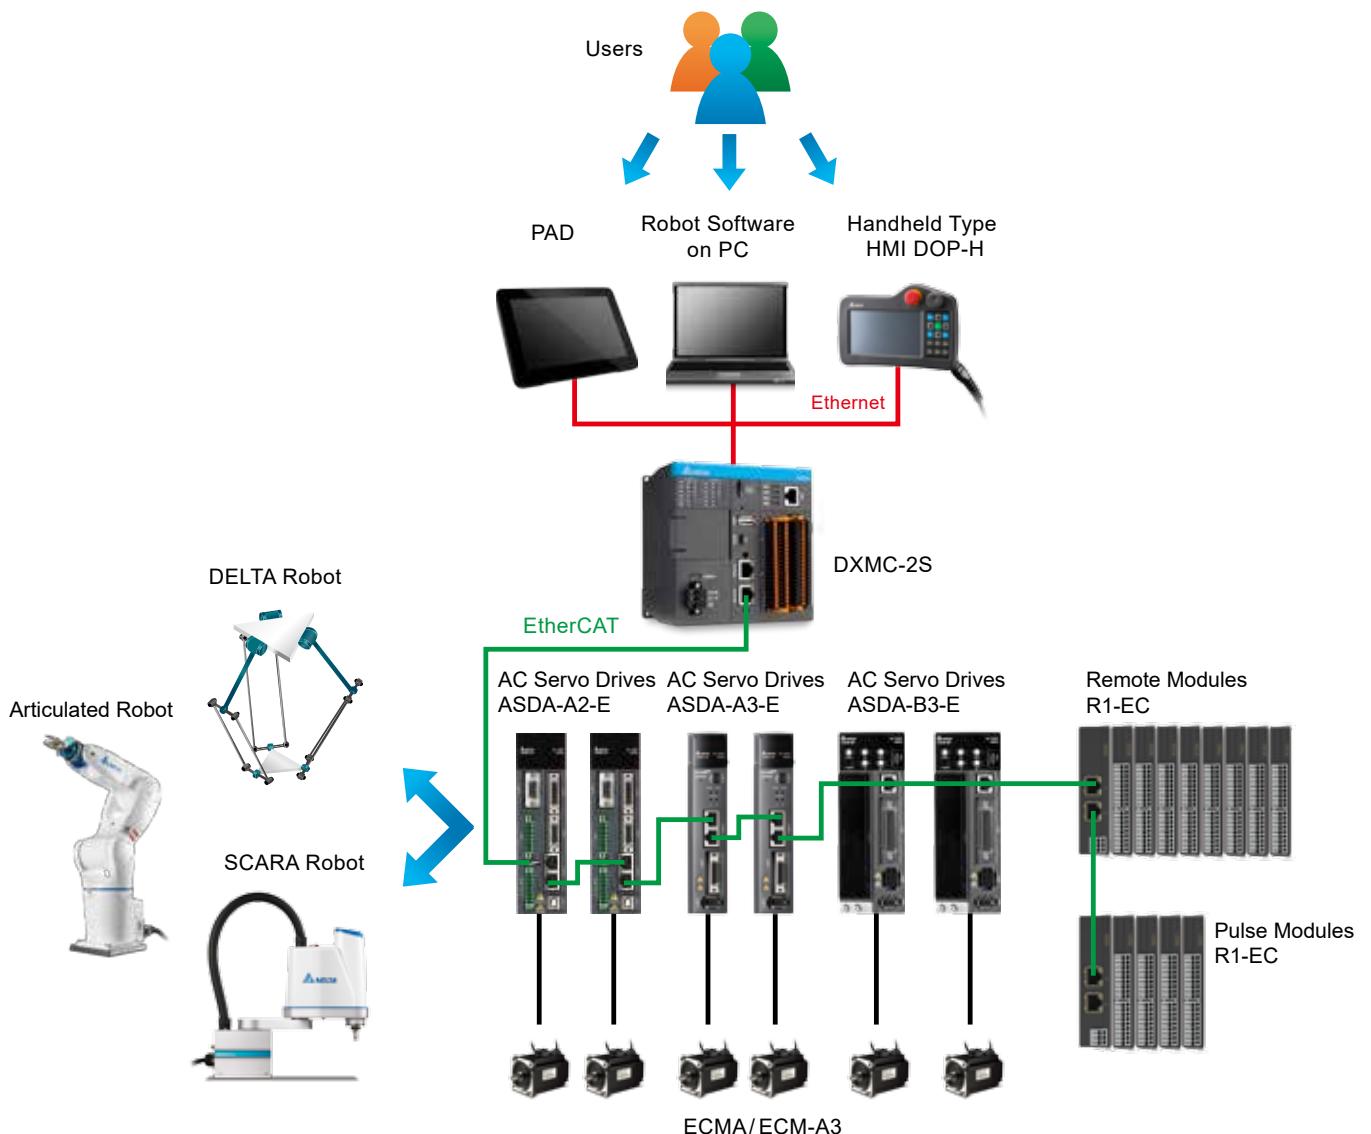

Features

DXMC-2S

- Max. 32 servo axes control
- Supports EtherCAT and Modbus TCP communications
- Execution cycle: 125µs, 250µs, 500µs, 1ms
- Built-in 16 DI/DO terminals and RS-485 serial port
- 1CH SSI Absolute encoder and 2 CH pulse encoder
- Built-in CODESYS SoftPLC & motion control programming

System Structure

Extended Standard Motion Controller

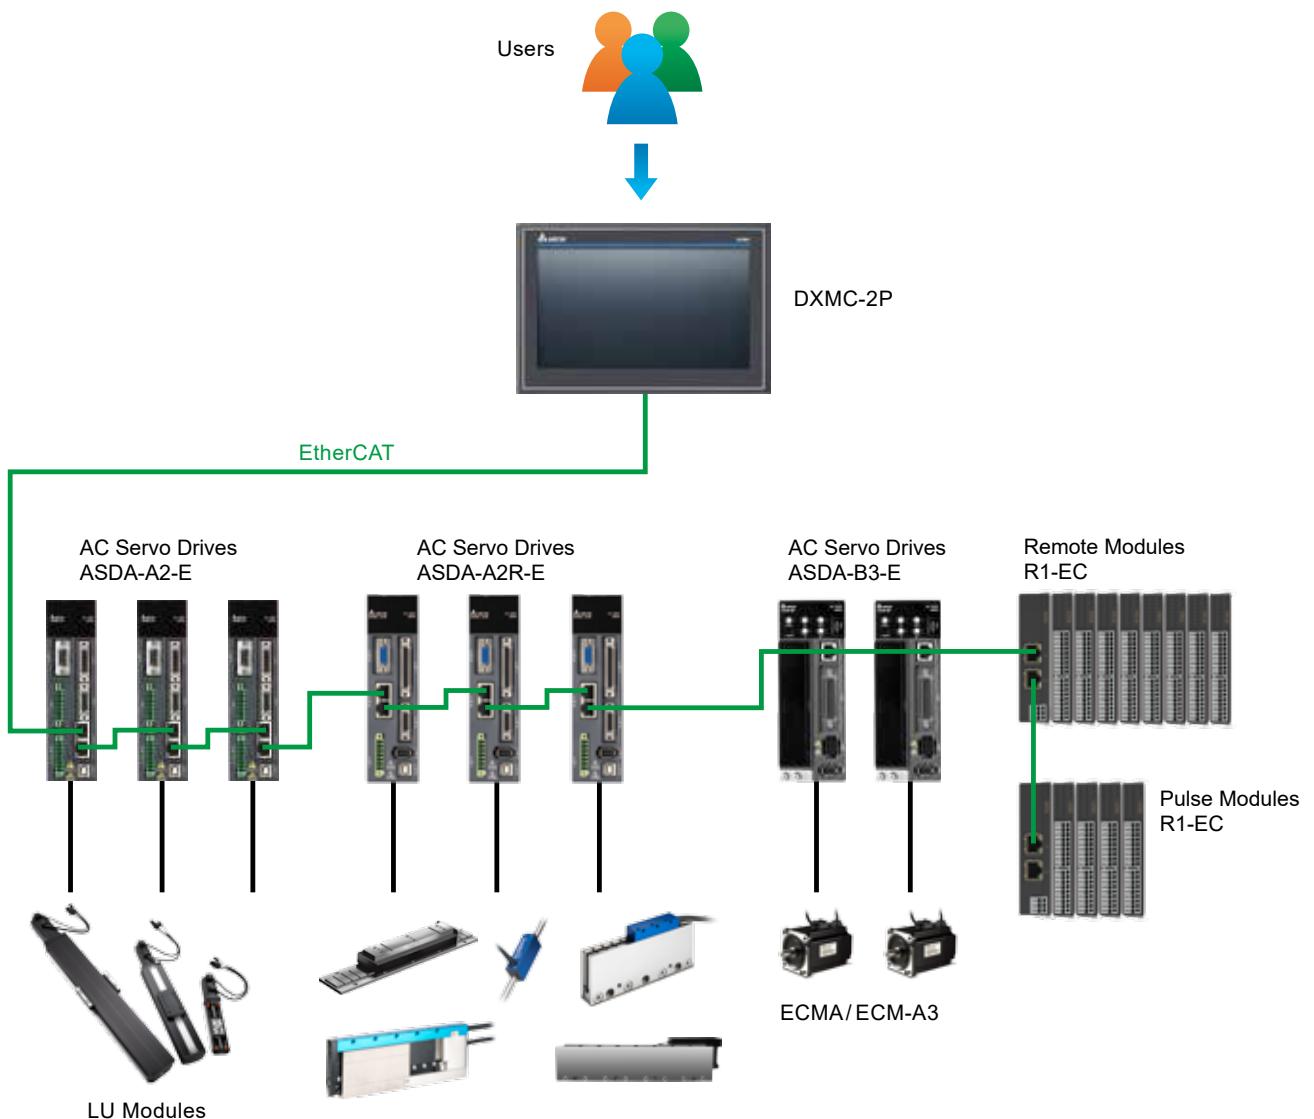

Features

DXMC-2P

- Motion controller integrated with HMI
- Display size: 7" and 10"
- Max. 8 servo axes control
- Supports EtherCAT and Modbus TCP communications
- Built-in CODESYS SoftPLC & motion control programming

System Structure

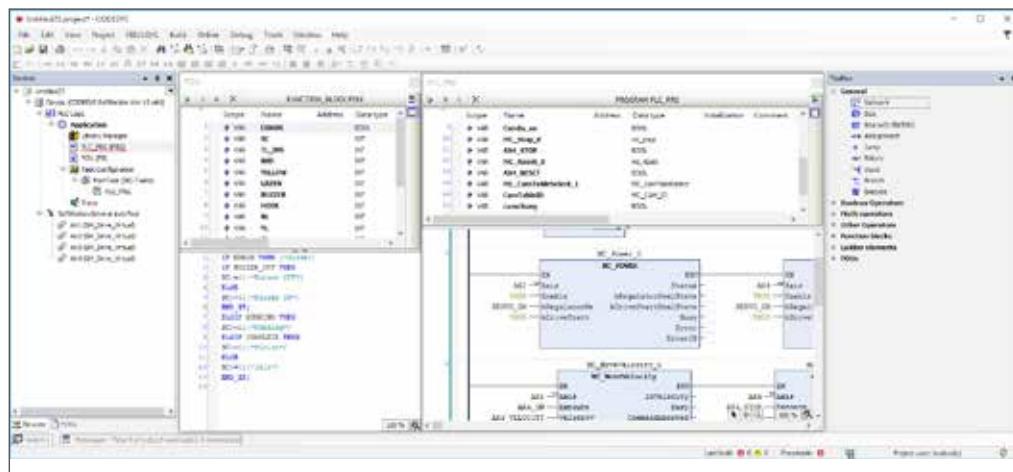

Software: Motion Control Platform Based on CODESYS

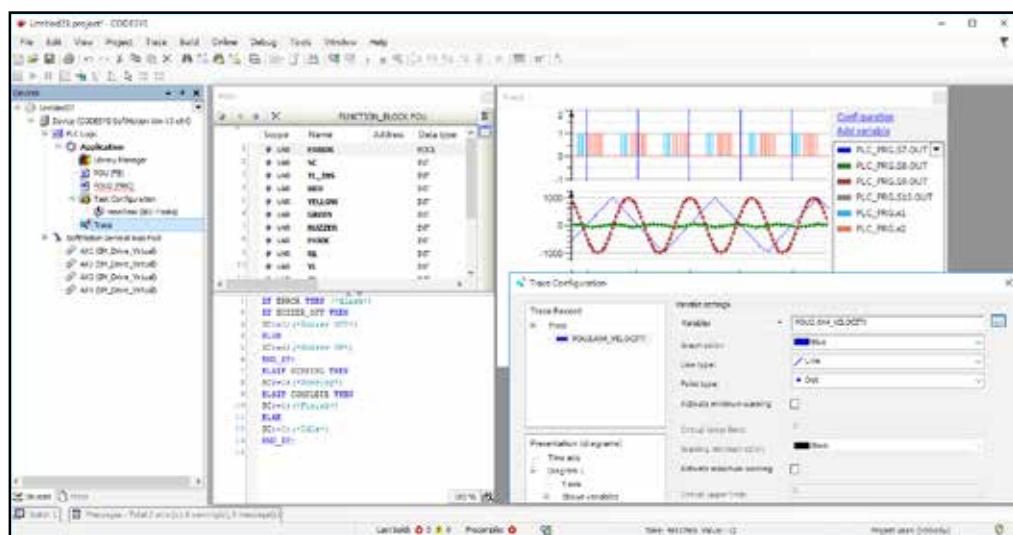

Standard IEC 61131-3 Programming

- Instruction List (IL)
- Structured Text (ST)
- Ladder Programming (LD)
- Function Chart Programming (FBD)
- Sequential Function Chart (SFC)

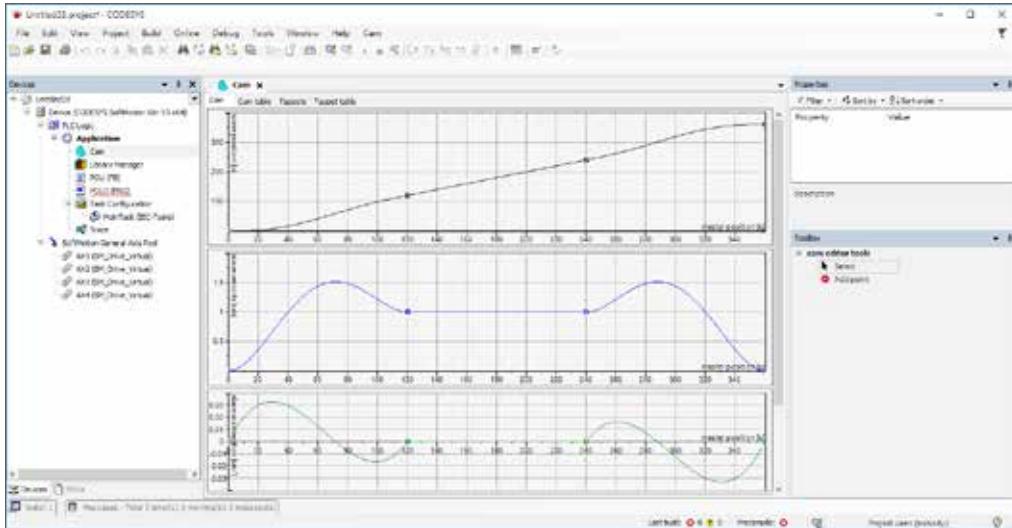

Tasks and Debugger

- Display of application data at runtime in simulation mode on SoftPLC and discrete controllers
- Reading, writing, and forced setting of variable values, directly in the respective editor
- Monitoring of specific values in watchlists
- Execution of code in single step or single cycle

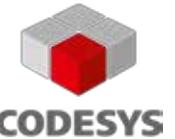

Motion Control Software Based on CODESYS - SoftMotion

- Supports single-axis and coordinated multi-axis traversing motion (e.g. master/slave functions and cams) control
- Library available to use in POU's and programming of motion functions
- Motion control function is connected with other functions based on CODESYS
- Graphical planning of CAM functions with integrated CAM editor
- Numerous POU-specific visualization templates for easy commissioning with the development system based on CODESYS
- Additional visualization templates for online editing of E-CAMs in runtime mode with HMI, such as TargetVisu and WebVisu

Software: Motion Control Platform Based on CODESYS

Features

- Creates structured and efficient applications from configuration to commissioning with one tool
- Optional object-oriented programming according to IEC 61131-3 (3rd edition), also blended with functional programming within the project
- Description document directly integrated into the tried and tested library for easy development
- Multi-platform development and application reusability with exchangeable target system descriptions for all devices compatible with CODESYS
- Versatile extensibility with the modular design and available add-ons
- Clear user interface and customizable windows

Benefits

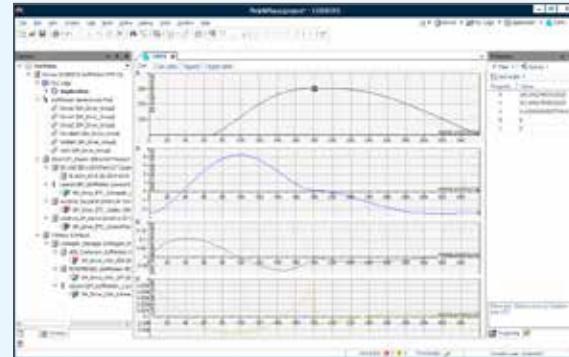

Standard PLCopen

- Single or multi-axis movements with PLCopen motion POU

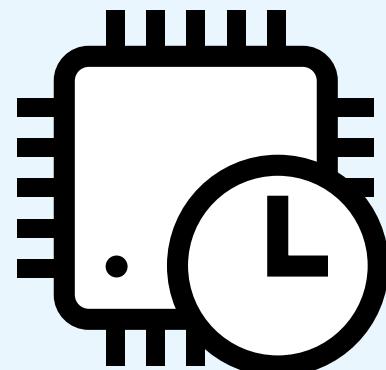

E-CAM

- Provides E-CAM synchronous control function
- Graphical interface for programming E-CAM curves
- Each E-CAM chart supports 65,535 points

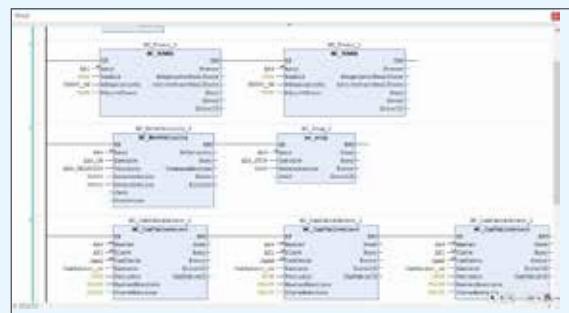

Real-Time System

- 1ms synchronous cycle controls a total of 64 real and virtual axes

Multi-Axis Function Block

- Motion control using IEC 61131-3 function blocks

Applications

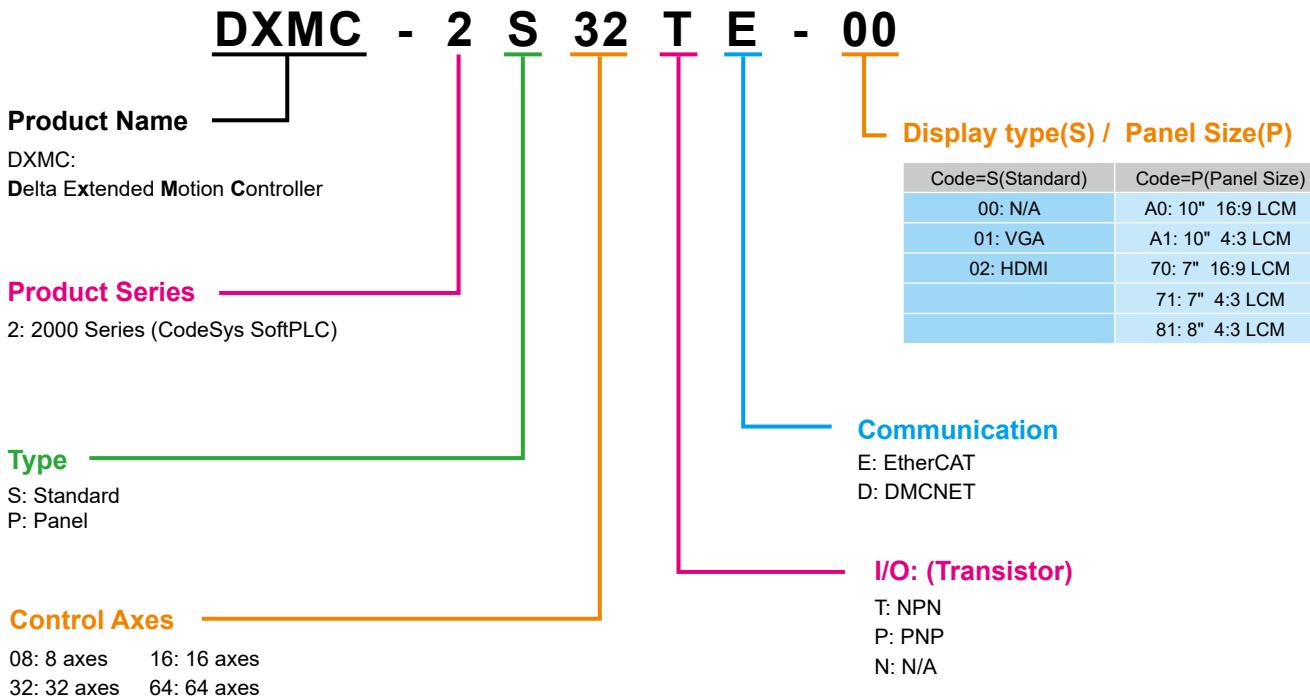

- Packaging machines, winding machines and printing machines

DXMC Series Extended Motion Controller

DXMC-2S32TE-00

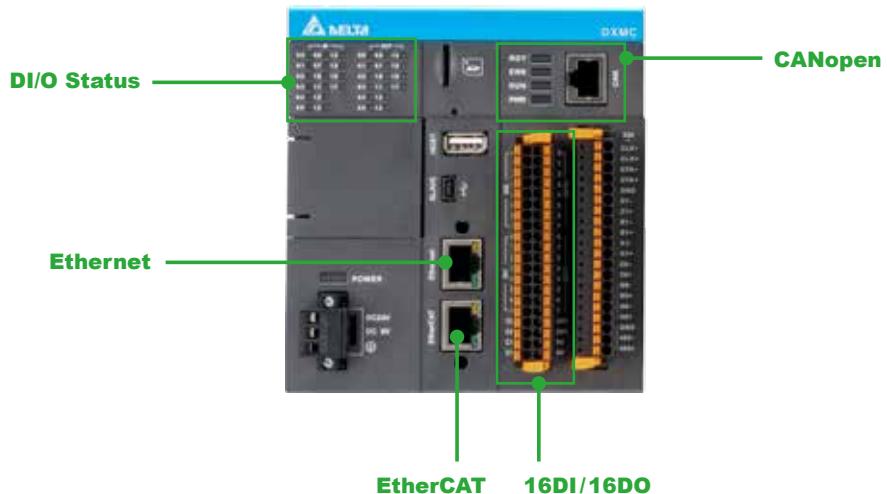

DXMC-2P08NE-A0

DXMC-2P08NE-70

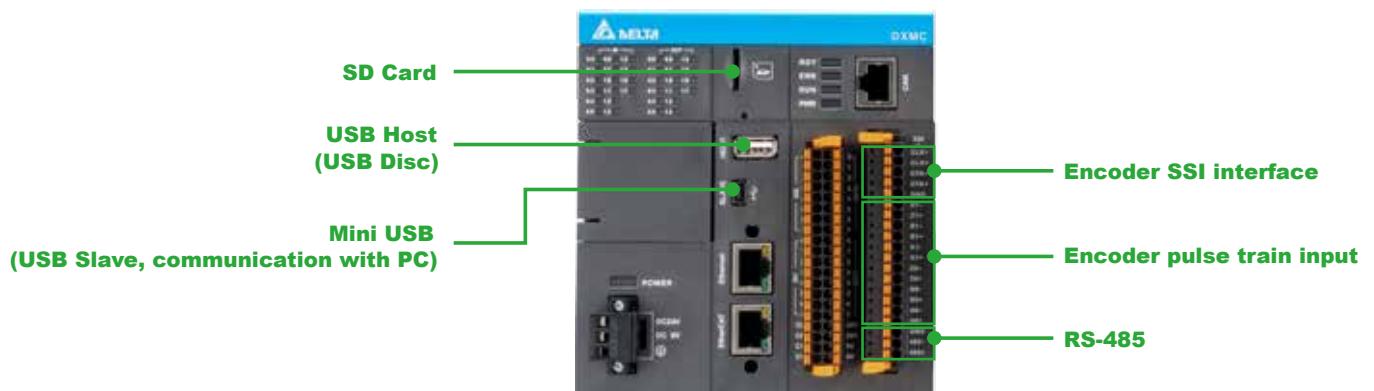

Product Information - Standard Type DXMC-S

- Max. 32 axes control, execution cycle 500 μ s
- EtherCAT bus: for communication with servo drives (high speed)
- CANopen bus: for communication with I/O modules or peripheral devices (low speed)
- EthernetIP interface: for communication with host controllers or multiple DXMC-Ss
- Built-in 16 DI/DO (All 16 DIs are high speed)

- Built-in two channels of encoder pulse train input: A/B/Z \pm differential signal
- Built-in one channel of communication type encoder input: SSI
- Built-in SD extension card slot
- Built-in USB interface (mini USB and USB Host)
- Built-in RS-485 communication port

Product Information - Standard Type DXMC-P

Product Parts

- 7" / 10" 65,536 colors TFT LCD, 1,024 x 600 pixels
- EtherCAT bus: for communication with servo drives (high speed)
- EthernetIP interface: for communication with host controllers or multiple DXMCs
- Built-in SD extension card slot
- Built-in USB interface (mini USB and USB host)
- Built-in RS-232 / RS-422 / RS-485 communication ports

Cooling System		Natural Air Circulation			Fan Cooling																						
Drive resolution		24-bit (16777216 p/rev)																									
Control of Main Circuit		SVPWM Control																									
Tuning Modes		Auto / Manual																									
Regenerative Resistor		None		Built-in																							
Position Control Mode	Pulse Type (Only for Non-DMCNET mode)	Pulse + Direction, A phase + B + CW pulse																									
	Max. Input Pulse Frequency (Only for Non-DMCNET mode)	Pulse + Direction: 4Mpps ; CCW pulse + CW pulse: 4Mpps ; A phase + B phase: Single phase 4Mpps ; Max. 200Kpps (Open collector) pps																									
	Command Source	External pulse train (PT mode) (only for Non-DMCNET mode) / Internal parameters (PR mode)																									
	Smoothing Strategy	Low-pass and P-curve filter																									
	Electronic Gear	Electronic gear N/M multiple N: 1~536870911, M: 1~2147483647 (1/4< N/M < 262144)																									
	Torque Limit Operation	Set by parameters																									
Speed Control Mode	Feed Forward Compensation	Set by parameters																									
	Analog Input Command (Only for Non-DMCNET mode)	Voltage Range	0 ~ ±10 V _{DC}																								
		Resolution	15-bit																								
		Input Resistance	1MΩ																								
		Time Constant	25 μs																								
	Speed Control Range ¹	1 : 6000																									
Torque Control Mode	Command Source	External analog signal (only for Non-DMCNET mode) / Internal parameters																									
	Smoothing Strategy	Low-pass and S-curve filter																									
	Torque Limit Operation	Set by parameters or analog input (only for Non-DMCNET mode)																									
	Frequency Response Characteristic	Maximum 3.1kHz																									
		0.01% or less at 0 to 100% load fluctuation																									
	Speed Accuracy ²	0.01% or less at ±10% power fluctuation																									
Analog Monitor Output		0.01% or less at 0°C to 50°C ambient temperature fluctuation																									
	Analog Input Command (Only for Non-DMCNET mode)	Voltage Range	0 ~ ±10 V _{DC}																								
		Input Resistance	1MΩ																								
		Time Constant	25 μs																								
	Command Source	External analog signal (only for Non-DMCNET mode) / Internal parameters																									
	Smoothing Strategy	Low-pass filter																									
Digital Inputs / Outputs	Speed Limit	Set by parameters or analog input (only for Non-DMCNET mode)																									
	Analog Monitor Output	Monitor signal can set by parameters (output voltage range: ±8V)																									
Digital Inputs / Outputs	Inputs	Servo on, Reset, Gain switching, Pulse clear, Zero speed CLAMP, Command input reverse control, Command triggered, Speed / Torque limit enabled, Position command selection, Motor stop, Speed position selection, Position / Speed mode switching, Speed / Torque mode switching, Torque / Position mode switching, PT / PR command switching, Emergency stop, Forward / Reverse inhibit limit, Reference "Home" sensor, Forward / Reverse operation torque limit, Move to "Home", Electronic Cam (E-Cam), Forward / Reverse JOG input, Event trigger PR command, Electronic gear ratio (Numerator) selection and Pulse inhibit input																									
	Outputs	Encoder signal output (A, B, Z Line Driver and Z Open Collector)																									
Protective Functions	Servo ready, Servo on, At Zero speed, At Speed reached, At Positioning completed, At Torques limit, Servo alarm (Servo fault) activated, Electromagnetic brake control, Homing completed, Output overload warning, Servo warning activated, Position command overflow, Forward / Reverse software limit, Internal position command completed, Capture operation completed output., Motion control completed output., Master position of E-Cam (Electronic Cam)		* Please note that the above digital signals and inputs are available only for Non-DMCNET mode. In DMCNET mode, it is recommended to write digital inputs into the servo drives through DMCNET communication, and the digital inputs should be used for Emergency Stop, Forward / Reverse / Inhibit limit and Reference "Home" sensor only.																								
	Communication Interface	Servo on, Reset, Gain switching, Pulse clear, Zero speed CLAMP, Command input reverse control, Command triggered, Speed / Torque limit enabled, Position command selection, Motor stop, Speed position selection, Position / Speed mode switching, Speed / Torque mode switching, Torque / Position mode switching, PT / PR command switching, Emergency stop, Forward / Reverse inhibit limit, Reference "Home" sensor, Forward / Reverse operation torque limit, Move to "Home", Electronic Cam (E-Cam), Forward / Reverse JOG input, Event trigger PR command, Electronic gear ratio (Numerator) selection and Pulse inhibit input																									
Environment	Installation Site	Indoor environment (free of direct sunlight), no corrosive liquid and gas (free of oil mist, flammable gas, or dust)																									
	Altitude	Altitude 1000m or lower above sea level																									
	Atmospheric Pressure	86kPa ~ 106kPa																									
	Operating Temperature	0°C ~ 55°C (If operating temperature is above 45°C, forced cooling will be required)																									
	Storage Temperature	-20 °C ~ 65 °C																									
	Humidity	0 ~ 90% RH (non-condensing)																									
	Vibration	9.80665 m/s ² (1G) less than 20Hz, 5.88 m/s ² (0.6G) 20 to 50Hz																									
Power System	IP Rating	IP20																									
	Power System	TN System ^{3,4}																									
Certification	Certification	IEC/EN 61800-5-1 · UL 508C 																									

Note: *1. When it is with the rated load, the speed ratio is: the minimum speed (smooth operation) / rated speed.

*2. When the command is the rated speed, the velocity correction ratio is: (free run speed - full load speed) / rated speed

*3. TN system: The neutral point of the power system connects to the ground directly. The exposed metal components connect to the ground via the protective earth conductor.

*4. Use a single-phase three-wire power systems for models of single-phase power
